Ultimate
BridgePad™ - The Wireless Bridge Scoring System

There are a number of issues that cause one to select a particular Electronic Scoring System over another. I am putting forward some items that appear to me to be extremely important in all Bridge Clubs

Advantages of using BridgePad over the Traveling cards

- 1 One BridgePad is placed on each table to use instead of paper travelers. Contracts and tricks made are keyed into the bridgepad and these immediately update all scores in the computer
- 2 Players identify themselves at the start - saving computer entry of names
- 3 After scoring a board the BridgePad shows an estimate of your board % and results so far. These results are just like a paper traveler. There is an option to show frequencies instead
- 4 Optionally, an interim ranking and percentage (including across sections!!) Can be displayed throughout the event. These can be a computer screen or projected onto a screen or wall.
- 5 At the end of play, the final ranking and percentages are shown the same way
- 6 For each round, the BridgePad shows pair numbers with orientation and boards to be played - helping avoid mis-pairings, forgetting to arrow switch, etc.
- 7 There is an option to insist that EW checks the details of the result
- 8 You enter tricks made - the BridgePad calculates the score - thus avoiding miscalculations
- 9 BridgePad identifies any wide variations in results for the director to check.

One thing is for sure. When you purchase the BridgePad System, you will be getting all that you will need to operate the fantastic system. No one likes to recommend a system that everyone keeps saying, "Doesn't that come with this? You mean that's extra? As you can see by the picture above, it comes with a carrying case and all that is required to do, just what it was meant to do, make life easier for the avid Bridge Player.

	BridePad	BridgeMate II.
1. Support Swiss Team Events	Yes	No
2. Confirmation of score by East/West	2 digit code or Next key	Accept Key only
3. Travelers per section.	Individual Scores or list. 4- 8 Screen	Individual Scores or List 4-12 Screen
